Interson Highlights FAST Exam with SeeMore USB™ Ultrasound at American College of Emergency Physicians Meeting

Pleasanton, CA

Interson Corporation (www.interson.com) will be exhibiting its SeeMore USB™ Point-Of Care Ultrasound Imaging probes at the American College of Emergency Physicians (ACEP) Scientific Assembly (booth #655) at the Mandalay Bay Resort in Las Vegas, September 28 - 30.

Interson offers abdominal probes for the FAST exam (Focused Assessment with Sonography in Trauma); high frequency probes for vascular access, optic nerve, and foreign body detection; and endocavity probes for transvaginal imaging. (Click to see video:

According to Roman Solek, President of Interson, “Point-of-care ultrasound is getting a lot of attention these days, and we are encouraged to see that our approach is being validated by many significant players. Our probes are manufactured in the U.S., and provide a cost effective solution to the needs of emergency personnel both in the hospital environment and in mobile settings.”

SeeMore is the first ultrasound imaging probe that plugs directly into the USB port of a laptop or netbook. With its unique open architecture design, SeeMore offers users greater flexibility at a lower cost than other portable systems, and gives the user a choice of screen size and probe type. Studies may be stored, exported, or printed from the user’s computer.

About Interson Corporation

Interson Corporation, an ISO certified, privately held corporation located in Silicon Valley, is a leading U.S. manufacturer of ultrasound imaging probes. Ultrasound systems using Interson products have been installed in offices, hospitals, and clinics around the world since 1989. Interson probes are designed and manufactured in the U.S.A. and have FDA 510(k) clearance, a CE mark by TUV Rhineland, and a medical device license from Health Canada. Recognized as one of the top ten innovations of the year by the International Academy of Science, SeeMore probes extend clinicians' vision beyond their fingertips. The SeeMore USB probe was highlighted on the popular television series "Royal Pains,"
